

Alleah Marie G. Bayas

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Cavite, Philippines | 09206412021 | alleahmariegb@gmail.com | <https://github.com/alleahbayas> | <https://alleahbayas-portfolio.vercel.app/>

WORK EXPERIENCE

1st Councilor (Head, Environmental and Publication Committee)

2023 - Present

Sangguniang Kabataan Council of Brgy. 1, Amadeo, Cavite

- Leveraged online platforms to promote youth engagement and local tourism initiatives in the municipality.
- Designed and developed digital informative publication materials for events, announcements, and promotional campaigns.

Software Development Intern

July - September 2025

Department of Science & Technology (DOST-CO-PES), Taguig City

- Contributed to the development and maintenance of software applications under DOST's Project LODI program, improving public service delivery through digital tools.
- Designed a new version of homepage layout for a statistical website using Figma, conducting inventory and researching best practices from official statistics websites to deliver a modern, user-friendly interface.
- Built a comprehensive data management WordPress plugin with two core modules, implementing full CRUD operations for agencies, agency-based user access control, and dynamic filtering capabilities.

Full-Stack Web Developer Intern

August - September 2024

ROC.PH Digital Services, General Trias, Cavite

- Worked as a full-stack developer on the web development team, creating Figma mockup designs for client websites and translating them into production-ready implementations in WordPress and Laravel.
- Developed responsive front-end interfaces ensuring cross-browser compatibility, converting UI/UX designs into clean, maintainable code for multiple client projects.
- Collaborated closely with clients to gather requirements, refine designs, and deliver web solutions aligned to their branding and business goals.

EDUCATION

Polytechnic University of the Philippines - Sta. Mesa

October 2022 - September 2026

Bachelor of Science in Computer Engineering, Major in System Development

- DOST-SEI Undergraduate Scholarship - Merit Scholar

PROJECTS

Barangay Kiosk System – RFID-Enabled Transaction Kiosk (Thesis Project)

Vue.js | Node.js | Tailwind CSS | PostgreSQL | JavaScript | Python

- Designed and developed the frontend interface for an offline kiosk - enabling residents to request documents, borrow equipment, and submit feedback.
- Contributed to building a companion admin dashboard for managing resident records and tracking transactions.

The Coche Events – Booking Appointment System

React.js | Node.js | SCSS | JavaScript

- Built a web-based appointment booking platform allowing customers to schedule car-trunk surprise deliveries
- Developed responsive UI components and integrated booking flow with backend services

HoldON – IoT Safety Device & Dashboard for Motorcycle Ride (Academic Project)

- Developed the frontend web dashboard using Vue.js, enabling passengers to set trip details and view a live map with real-time GPS tracking, route, and estimated arrival
- Built a responsive, shareable, no-install-required interface for family/friends to monitor trip status and receive real-time emergency and "passenger not moving" alerts

Architectural Portfolio Website

React.js | Node.js | Tailwind CSS | MongoDB

- Built a professional portfolio site for a client to showcase architectural design projects.
- Designed a modern, minimalist, responsive layout optimized for presenting project galleries
